

ESG REPORT 2022 | ANNEX: ENVIRONMENTAL DATA

Dare Together

Majid Al Futtaim 2022 Environmental Data

| This data report provides an overview of the environmental performance of Majid Al Futtaim Group's assets. It fulfils our aspiration to lead by example through increasing the transparency of our reporting. |
|--|
| The data in this appendix supplements the key performance indicators and long-term target progress under the Rethinking Resources focus area of Majid Al Futtaim's 2022 ESG Report. |
| The European Public Real Estate Association (EPRA) Sustainability Best Practices Recommendations (sBPR) Guidelines, The GHG Protocol Corporate Standard and the requirements of GRESB have been used as a guide for the content in the following tables. |
| All data in this report covers our latest reporting year (2022) for Majid Al Futtaim's absolute impacts, and the two latest reporting years (2021 and 2022) for its like-for-like impacts. |
| We report on assets where Majid Al Futtaim has operational control. This means that we only report on assets where we have some form of management control, such as property management, which excludes properties where we have a financial investment but no managerial control. |
| This means that we report on the assets where we are directly responsible for their impacts and performance. The report covers all countries where we have assets under our operational control. |
| The developments included are new major construction projects where Majid Al Futtaim - Properties will have operational control, is the major stakeholder and were underway during 2022. |
| Some data has been restated where known data gaps have been filled and small errors rectified. Additionally, emission factors have been updated. |
| For our Properties portfolio, we have reported actual consumption data for all assets. |
| However, where actual energy and water consumption data was unavailable for our Retail, Entertainment and Lifestyle portfolios, we have estimated the missing consumption data using the following techniques in order of preference: |
| Where 2022 actual consumption data was available for a utility for a particular time period (e.g. month / quarter / year) |
| Consumption was calculated from provided cost data, using country- specific average utility unit rates for that year |
| |

3. Consumption was calculated using consumption per unit of floor area benchmarks for assets of the same type

| PROPERTIES | We have been able to report on all operational assets in our portfolio that are under our operational control. In 2022, this includes 29 shopping malls and community malls, 13 hotels we own in the UAE and Bahrain and all 4 of the offices that we own. We have also reported on the phases of our three community developments at Al Zahia, Tilal Al Ghaf and Tilal al Irfan, which have been completed and are now operational. |
|---------------|--|
| DEVELOPMENTS | We have reported on the energy consumed in our development projects active during 2022 including Lebanon Waterfront City SP1, Al Zahia Uptown and Al Zahia Yasmeen. |
| RETAIL | We have reported on all our retail outlets, as well as the supporting facilities including staff accommodation and distribution warehouses. |
| ENTERTAINMENT | We have reported on all outlets and supporting corporate office spaces for Food and Beverage, Magic Planet, VOX Cinemas, Ski Domes, Dreamscapes, ENOVA offices, and Waterparks. |

LIFESTYLE

We have reported on all our Fashion stores.

- 3 Other fuels includes natural gas, LPG, petrol and diesel, used at a small number of asset sites within the Properties Operating Company and across the Retail and Entertainment Operating Companies.
- 4 Cooling energy is measured in kWh of coolth for district cooling schemes. However for Retail, Entertainment and Lifestyle, where cooling is received from the asset sites' landlord, it is measured in kWh of electricity equivalent.
- Reported electricity consumption for the Hotels portfolio includes some non-electric energy (converted to kWh electricity equivalent) used to provide heating and cooling to the hotels.
- Other fuels for the Retail Operating Company includes fuels for owned fleet and fuels used within buildings.

¹ District cooling GHG emissions are calculated using a UK district steam conversion factor due to lack of available factors for district cooling in the UAE. Received cooling from landlord supplies is included as Scope 2. *Scope 2 Location-based emissions are emissions calculated using the national grid factors.

⁹ Cooling energy is measured in kWh of coolth for district cooling schemes. However, for Retail, Entertainment and Lifestyle, where cooling is received from the asset sites' landlord, it is measured in kWh of electricity equivalent.

⁹ No assets within the Communities portfolio are included in the like-for-like analysis as applicable assets. Al Zahia and Tilal Al Ghaf are still under development.

Data notes:

Numerator: Common parts and shared services electricity consumption (except for Hotels and Offices where whole building energy consumption is used) has been used to measure Majid Al Futtaim's building efficiency as electricity makes up the vast majority of its energy consumption and data is available for the last 3 years.

Denominator: Common parts floor area is used to normalise the common parts and shared services electricity consumption as this is a direct match of numerator and denominator. In all other cases, gross internal area is used.

^{*}Scope 2 Market-based emissions are emissions calculated using supplier specific emission factors for the electricity purchased from renewable sources via energy supply contracts such as PPAs and unbundled renewable energy certifications e.g., IRECs and CECs. For the remainder of electricity not backed by clean or renewable supplier contracts, the national grid factors were used in the absence of published residual mix factors. A residual mix emission factor represents the emissions and generation that remain after certificates, contracts, and supplier-specific factors have been claimed and removed from the calculation.

Fugitive emissions from refrigerant top-ups are included in Scope 1.
 Embodied emissions are not included in the table above.

⁻ Scope 3 emissions sources include tenant emissions and transmission and distribution losses only. For further Scope 3 figures see page 7.

¹² Emissions are measured in tonnes of CO2 equivalent which is the combined weight of the main greenhouse gases [CO2, CH4 and N2O in the case of the energies used by Majid Al Futtaim) that contribute to climate

Data notes: Fugitive emissions from refrigerant top-ups are included in Scope 1. Embodied emissions are not included in the table above.

Data notes:

Numerator: CO2 emissions related to building energy consumption (excluding fugitive emissions from refrigerant top-ups) under Majid Al Futtaim's direct control, i.e. Scopes 1 and 2. Emissions are measured in tonnes of CO2 equivalent which is the combined weight of the main greenhouse gases (CO2, CH4 and N2O in the case of the energies used by Majid Al Futtaim) that contribute to climate change as identified by the Kyoto Protocol.

Denominator: Common parts floor area is used to normalise the common parts and shared services emissions as this is a direct match of numerator and denominator. In all other cases gross internal area is used.

TOTAL 2019 SCOPE 3 GREENHOUSE GAS EMISSIONS INVENTORY (tCO2e)

| | | Scope 3 Em | issions (tCO ₂ e) | | |
|--|------------|------------|------------------------------|-----------|--|
| Emissions Category | Properties | Retail | Entertainment | Lifestyle | Description |
| Category 01 - Purchased goods and services | 321,478 | 6,113,694 | 51,082 | 72,029 | Covers emissions from purchased goods and services from our tier 1 suppliers e.g., IT, FM , legal, consulting, office goods suppliers and construction contractors such as the embodied carbon in our developments |
| Category 02 – Emissions from capital goods | N/R | 4,015 | N/R | N/R | Covers emissions from purchased capital goods such as shelving units, large machinery |
| Category 03 – Fuel and energy related activities | 40,665 | 32,181 | 4,459 | 208 | Covers emissions from the transmission and distribution losses of purchased electricity and well-to-tank emissions from purchased fuels |
| Category 04 – Upstream transportation and distribution | 3,390 | 314,297 | 9,219 | 16,578 | Covers emissions from the transportation of purchased goods and services from our supplier premises to our premises |
| Category 05 – Waste generated in operations | 17,570 | 119,078 | 8 | 6 | Covers emissions from waste generated in operations, including construction activities |
| Category 06 - Business commuting | 26,581 | 3,426 | 438 | 85 | Covers emissions from employee travel for business purposes |
| Category 07 - Employee commuting | 1,156 | 29,105 | 3,416 | 2,816 | Covers emissions from employee commuting between our premises and home |
| Category 08 – Upstream leased assets | N/R | N/R | N/R | N/R | All emissions from use of energy in our premises, owned or leased, are included in our Scope 1 and 2 $$ |
| Category 09 - Downstream transportation and distribution | N/R | 14,449 | 937 | 835 | Covers emissions from the transportation of sold goods and services |
| Category 10 - Processing of sold products | N/R | N/R | N/R | N/R | No goods we sell are processed further |
| Category 11 – Use of sold products | 393,313 | 250,226 | 110 | 684 | Covers lifetime emissions of our sold products such as our residential buildings, as well as electronic appliances manufactured under our label |
| Category 12 – End-of-life treatment of sold products | 86,327 | 388,991 | 122 | 233 | Covers emissions from the processing of waste for our sold products, when they reach end of life $$ |
| Category 13 – Downstream leased assets | 208,460 | N/R | N/R | N/R | Covers emissions from the energy usage in our tenanted areas |
| Category 14 - Franchises | N/R | N/R | N/R | N/R | We don't operate as a franchiser |
| Category 15 – Investments | 15,056 | N/R | N/R | N/R | Covers emissions from the energy used in real-estate assets we co-own e.g., joint ventures, apportioned according to our financial stake in those assets |
| Total Scope 3 emissions | | | | | |

PROPERTIES' SCOPE 3 GREENHOUSE GAS EMISSIONS (tCO,e)

¹⁵ As Majid Al Futtaim - Properties' emissions targets were validated by the Science Based Targets initiative in 2022, its emissions figures have been included in the Environmental Data Annex. The Retail, Entertainment and Lifestyle Operating Companies' science-based targets were validated in 2023, therefore their Scope 3 emissions figures will be included in the Environmental Data Annex of the 2023 ESG Report.

¹³ No assets within the Communities portfolio are included in the like-for-like analysis as Al Zahia and Tilal Al Ghaf are still under development.
